

A special "Thank You" and congratulations from **VINTAGE ANGUS RANCH**

to long-time buyer and winner of the 2018 Beef Quality Assurance Award

BENTLY RANCH

Bently Ranch, based in Minden, Nev., is a large, diversified commercial cattle and farming operation that prides itself on sustainability.

Bently Ranch was recently recognized by the National Cattlemen's Beef Association as the 2018 BQA Winner for its innovative approach to doing what is best for the land and natural resources, the livestock, and the community they are a part of.

"Bently Ranch has been purchasing Vintage Angus Bulls for the last 15 + years. We have had and will continue to have full confidence in all of our bull purchases from Vintage. The Bulls are some of the top genetics to be found anywhere in the United States and will stack up to any breeder in the United States. The bulls have always been grown out well, both to show their genetic potential and always given us many years of service. We believe that the genetics from Vintage Angus have been a large contribution to our successful meat business and topping of the Western Video Market sales. We will continue to be a return buyer and will have full confidence in the genetics we purchase from Vintage Angus."
