"Rancheria Land & Livestock has been using Vintage Angus bulls for four years. In that time, we have been able to create a feed efficient female with excellent maternal traits and conformation. Vintage Angus bulls have also helped us produce yearlings that perform on our grass fed operation at Red House Beef as well as in the feedlot and grading at 48% Prime. In addition, we have been using females from Vintage Angus to vastly improve the genetics of our registered cattle at Bar KJ Angus, creating an elite seedstock herd. The impressive genetics combined with the excellent customer service we have found at Vintage Angus is why we will continue to come back year after year to purchase bulls for our combined 2000 cow operation."
